TXO is a global market leader in telecoms asset management. Our services are available individually or packaged into a turnkey solution, with all activities carried out in line with regulatory legislation.

## Asset recovery & valuation

---

We offer a fully managed end-to-end telecom network asset recovery service to ensure you recover maximum residual value from your new and used networking equipment. Our clients can also benefit from considerable data driven expertise in relation to the evaluation of their assets.

## De-installation & decommissioning

---

We have a wealth of experience in managing reverse logistics programmes and ensure the safe and efficient de-installation and removal of redundant telecom network hardware.

## Asset management reporting

---

From one-off campaigns to group-wide solutions, track, measure & control your assets with i-TRAC. A secure online platform that gives you complete control and visibility of your inventory in real-time.

## Spare parts management

---

We can categorise telecom equipment to part code, serial, description and hardware revision level, allowing you to view your inventory 24/7.

## Identification & warehousing

---

Reduce your OPEX by letting us identify and catalogue your spare telecom network infrastructure. We can also store thousands of parts comfortably, at attractive rates.

## Remote hands

---

With our remote hands service, you can outsource routine maintenance tasks and free up your team.

## Asset redeployment & resale

---

TXO can remarket your equipment to our extensive network of purchasers from global OEMs, operators, enterprises and trade sales.

## Test & repair

---

Our test and repair service covers the full spectrum of fixed, mobile, LAN, WAN, CATV and broadband technologies.

## Data wiping & destruction

---

TXO has a range of Blancco certified data wiping and secure data destruction solutions on offer.

## WEEE recycling

---

We provide a comprehensive and compliant WEEE recycling service.
