

The TXO logo is positioned in the top left corner, set against a bright green curved background. The letters 'TXO' are rendered in a bold, sans-serif font, with the 'O' being white and the other letters black.

WEEE recycling

A circular inset image shows a close-up of a person's hands wearing grey work gloves. They are using a red-handled screwdriver to work on a blue and white electronic device, likely a power supply unit or similar component. The background is blurred, showing what appears to be a factory or workshop setting with various equipment and lights.

Let us help you to reduce your carbon footprint and reach environmental goals with our recycling services.

Leaders in telecoms recycling

Here at TXO we're passionate about sustainable business and are committed to the highest standards of responsible telecoms recycling and precious metal extraction.

Where equipment has no further market value, or cannot be refurbished for return to service, we offer a comprehensive WEEE (Waste Electrical and Electronic Equipment) recycling service and work with customers to reduce their carbon footprint through strategic recycling and responsible disposal of telecoms network e-waste.

Passionate about sustainability

As Europe's leading recycler of Telecoms equipment, we process over 250T of waste materials per month.

- Safe, secure and ethical disposal of end-of-life telecoms network infrastructure.
- Waste Electrical and Electronic Equipment (WEEE) reporting and compliance.
- Total waste management solution includes collection, storage, harvesting of precious metals, recycling and reporting.

The size and scale of our asset recovery operations means we are able to command exceptional pricing from smelting partners, which translates into the highest possible recycling yields for the customer.

Types of equipment we recycle

We specialise in WEEE category 3: IT and telecommunications equipment and can handle waste recycling and disposal for all types of telecoms and data equipment. This includes mainframes, networking, telecoms, digital and analogue broadcasting, mobile communication infrastructures, cabinets, base stations (BTS), computers, peripherals, circuit boards and components including storage media and HDD.

Benefits

- Realise the value of your end-of-life telecoms assets and increase profitability.
- Divert useful resources from landfill and achieve huge carbon savings.
- Fulfil your WEEE obligations and comply with stringent environmental legislation.
- Work with an EcoVadis corporate social responsibility (CSR) rated supplier.

Certifications & compliance

At TXO we have all the relevant certifications and permits for safe & efficient recovery, processing and transportation of electronics waste.

- Certified to ISO 9001 & TL 9000, ISO 14001:2015, ISO 27001 and ISO 45001
- Approved authorised treatment facility (AATF) and approved exporter (AE) status
- Hazardous waste permit
- Waste carriers licence
- Detailed certificates of destruction
